

Workflow Verification Evidence

Student: Alia

Variant ID: D3-A

Critical Workflow Declared Before Fixes

Recruiter selects candidate
-> clicks Analyze Resume
-> sees score and signals
-> updates candidate status
-> dashboard reflects the result

Before-Fix Evidence

Step	Expected Behavior	Actual Behavior	Evidence
Select candidate	Candidate card opens	Worked correctly	Dashboard loaded 4 candidates
Analyze Resume	Score and signals appear	Analysis failed: Resume analysis is disabled in this environment	Error message in UI, 503 from API
Review score/signals	Score number and bullet points show	Never reached, blocked at analysis	N/A
Update status	Status saves and persists	Never reached, blocked at analysis	N/A
Dashboard reflects result	Summary counts update	Never reached, blocked at analysis	N/A

After-Fix Evidence

Step	Passed?	Evidence
Select candidate	Yes	All 4 candidates visible and clickable
Analyze Resume	Yes	Analysis complete: Needs Review Score: 68
Review score/signals	Yes	Score and signals displayed on candidate card
Update status	Yes	Status dropdown change saved successfully
Dashboard reflects result	Yes	Summary counts updated correctly
Refresh/reload	Yes	State persisted after Cmd+R

Remaining Risk

- Resume files must be manually present in tmp/resumes/ on every deployment machine.
- Mock AI values are placeholders — not suitable beyond demo use.
- Port 5000 conflict on macOS requires PORT override in .env.
