

Final Outcome Tier Record

Student:

Final outcome tier:

- ☐ Strong Pass 
- ☐ Pass
- ☐ Revision Required
- ☐ Incomplete

Strongest Demonstrated Capability

Capability: Debugging during Day 1's investigation process.

Evidence:

Required Growth Area

Growth area: AI's usage and judgement clarity during Day 5's decision making process.

Evidence: https://drive.google.com/drive/folders/1cbxAZjdaPuy6QHdjF0842lSwlOpml_Vn

Final Student Summary

In 5-7 lines, summarize what this outcome means.

I was confident in making debugging decisions on my own, but the challenge became much harder when AI presented multiple possible solutions. Under the pressure of limited time, it was easy to second-guess my own reasoning and feel uncertain about which option to choose. Instead of accepting AI's suggestions blindly, I took the time to evaluate each one critically. By comparing them with my own understanding of the problem, I was eventually able to make the decision I believed was the best. The experience reinforced the importance of treating AI as a helpful assistant rather than the final authority.
